

She Hacks

Time 30th March 9.00 am – 7.00 pm

Aparoksha in association with IEEE conducted a socio-technical event- She Hacks. The vision of a technical fest as ours is to empower girls in different technical fields and help them polish their skills. Our event resonates with the ideologies of IEEE. We conducted a 10 hour hackathon just for girls, where great minds developed real life solutions and showcased their advanced technical capabilities. This was the second edition of ♀Hacks (SheHacks), meant only for girls!

A team had a maximum of 3 members(only girls). We believe that making the choice to participate is itself appreciable and thus we arranged for exciting goodies for all participants with no registration or participation fee. We invited all the interested participants to collaborate on various real-life projects to bring out innovative solutions and be a part of Aparoksha. Software and Hardware projects were all invited.

After a grueling 10 hour long session, SheHacks'19 concluded on a note of success, contentment and satisfaction for participants, mentors and organisers. Around 25+ teams and 70+ girls set a milestone in the hackathon streak of IIIT Allahabad. The projects made were remarkable and the technical excellence shown by the girls of IIIT Allahabad was breathtaking.
